COMPUTER TOOLS

- Python
- C/C++
- VHDL
- Arduino
- Microcontroller
- HTML/css
- Java script

LANGUAGES

- English
- French
- Spanish

MASTERED SOFTWARE

- MATLAB
- Arduino .IDE
- ISIS Proteus
- Eagle
- PSIM
- visual Basic

PROFILE

An ambitious individual with a strong academic foundation and effective communication skills, aiming to contribute to project success and achieve professional goals.

EDUCATION

○ **license in Electronic, Electrotechnics and Automatics ,speclaty Electronic and industrial computing**

•faculty of sciences of Gabès

○ **Bachlor of technology**

•Macknassy institute

PROJECT

• Electronic circuit Design
- Design and testing of the stable circuit and Twilight Switch using industy- standard PCB software
-PCB conception and routing of BCD décoder and NE555 timer - based application
-Developement of control board and PIC16F microcontroller-based systems
•Developing and programming Arduino boards
-operating c- 9598 robotic arms
-working on thé control systems of Smart cars
-Installing and maintaining domestic or industrial electrical systems
- creating graphical user interfaces using java script and visual studio
